Dr. John Campbell: comparison of Pfizer antiviral with Ivermectin

<https://www.youtube.com/watch?v=ufy2AweXRkc>

Personal note: My doctor, just today, told me the efficacy of Ivermectin has not been proven. That is a propagandistic talking point. Vaccine advocates insist that the only proof they will accept are large double blind randomized and controlled trials (i.e. millions of dollars and significant time). Yet nobody will sponsor such trials because Ivermectin is generic and there is no money to be made on it. Meanwhile, Uttar Pradesh (the largest state in India) and Japan started using Ivermectin and the death rates plummeted to single digits, and the tropical parts of Africa, where Ivermectin is routinely used for parasites, has extremely low death rates. Dangers of the Vaccines

New research: Evidence of causal connection between vaccines and death (Sucharit Bhakdi and Arne Burkhardt)

Paper:

Video of Sucharit Bhakdi's summary presentation:

<https://odysee.com/@DotConnectorReports:e/Doctors-for-Covid-Ethics-An-Interdisciplinary-Symposium-II---Sounding-the-Call-:9?r=CwXyu58QiReBae4KHMUhz8HwVMaj86RX&t=509>

Forensic autopsies show that in multiple people who died after the vaccine, their vital organs were attacked by the body's own killer cells. Furthermore, the lymphocytes, which control immune response itself, are being destroyed by the vaccines, leaving the body vulnerable to far deadlier dormant viruses and other pathogens, such as cancer tumors, and even TB.

Prof. Dr. Arne Burkhardt's presentation starts 0:22:07.

<https://odysee.com/@DotConnectorReports:e/Doctors-for-Covid-Ethics-An-Interdisciplinary-Symposium-II---Sounding-the-Call-:9?r=CwXyu58QiReBae4KHMUhz8HwVMaj86RX&t=1327>

The talk is technical, but the key is the abnormal presence of T-lymphocytes in critical organs. In the slides, they show up as small dark dots. T-lymphocytes are present because the affected tissue is producing the spike proteins due to the vaccine.

British children up to 52 times more likely to die following a COVID shot: gov't report

<https://www.lifesitenews.com/news/children-in-britain-up-to-52-times-more-likely-to-die-following-a-covid-shot-report-finds/>

This study is based on all-cause mortality, since that is a more stable statistic than numbers assigned to a presumed cause. Steve Kirsch points out that the association of these death statistics with the vaccination is underlined by the fact that the statistic is dose dependent. In other words, if the death rates were not due to the vaccine, why would the number of shots affect the outcome?
